

## HOW WE ORGANIZE OURSELVES

### INTRODUCTION

Human migration is the movement by people from one place to another with the intentions of settling temporarily or permanently in the new location. The movement is often over long distances and from one country to another. Here, in this module learners understand migration, types of migration and why migration takes place?

**Learners begin** by interconnectedness of human-made systems and communities; the structure and function of organizations; societal decision making; economic activities and their impact on humankind and the environment. Ultimately, all the societies of the world have overlapping themes and cultural exchanges which result in a shared, common understanding of the world around us.

**Learners exit this module** with an understanding how we organize ourselves.

**This module is a part of the “LIVE - A HAPPY HEALTHY AND RESPONSIBLE LIFE” series.**

## MODULE DETAILS

- **Series 5: Explore - Communities and Cultures**
- **Module 2: How We Organize Ourselves**
- **Student Accomplishment Level: 4**

Grade Group : >8      Number of Sessions: 8      Session Duration: 60 min

### SESSION EXPERIENCE

1. **Tuning In:** Understand the module structure and goals. Learn the use of tools such as engineering kit and build basic engineering assemblies.
2. **Why Migrate?:** Understand the different reasons for migration among humans.
3. **Types of Migration:** Learn about the different types of migration and the categories of people corresponding to the types of migration.
4. **Pull and Push:** Understand the pull and push factors that affect migration.
5. **Hall of Fame:** Understand migration's impact on the cultural diversity of a region or country through heritage sites, architectural elements and cultural monuments.
6. **Role Models:** Study a list of renowned personalities from the world and explore the cultural significance of the role models on societies.
7. **Challenge:** Journey to Mars!: Design a public service announcement to general public about a mass journey to Mars from Earth with all their knowledge about migration and the challenges it poses.
8. **How Did I Do?:** Reflect on the learnings from the modules: Concept of migration. Present work done to peers.

### Learning Objectives:

Learners will:

1. Be able to understand basic concept of migration and factors that cause and affect migration.
2. Follow instructions, think critically, solve problems and create tangible artifacts.
3. Engage in active collaboration, communication and design thinking.
